DETAILED ACTION

1. This office action is in response to the amendments of 7/10/2007. It is noted that claims 1, 3-13, and 15 have been canceled, claims 2, 14, and 16 have been amended, and claims 17 and 18 have been added.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 2, 14, 16, 17, and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 17 and 18 both contain a version of the phrase "a spring....disposed to surround a portion of said flow control valve". This is not how the spring assembly is described in the specification or how it is represented in the drawings. The spring 68 in Figure 1 clearly does not surround any part of the flow control valve 38, it actually surrounds rod 68. Rod 62 is never described as "a portion" of the control valve in the specification and the valve 38 was never said to comprise rod 62. The following excerpts from the specification do not lend any indication that the spring surrounds "a portion of the flow control valve": "Valve 38 comprises peripheral surface 40 that includes lands and grooves for providing a slideable seal with the bore"

Application/Control Number: 10/631,363 Page 3

Art Unit: 3746

and "A coil spring 68 about rod 62 between bracket 56 and actuator 52 biases the actuator against end plug 60 to thereby bias valve 38 in the open position."

4. Claims 2, 14, 16, and 17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 17 contains the phrase "a plunger element rigidly secured to said second end of said flow control valve". Again, this is not how the assembly is described in the specification or how it is represented in the drawings. The plunger 52 is clearly connected to rod 62, which is then secured to flow control valve 38. This is described in the specification by the following sentence: "Actuator [or plunger] 52 is connected to valve 38 by a rod 62 that extends through bracket 56." Therefore, the plunger element is never described, or shown, to be rigidly secured to said second end of said flow control valve.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 18 contains the phrase "a spring including a first end and a second end axially opposite said first end, having said first end seated against

Application/Control Number: 10/631,363 Page 4

Art Unit: 3746

axial displacement relative to said housing". This claim is indefinite because it is unclear how a first end of a spring can be seated against an axial displacement relative to the housing and not the housing itself.

Response to Amendment

7. The lack of prior art rejections is not an indication of allowability; however, upon correction of the various 35 USC 112 rejections, as noted above, the Examiner would further consider the allowability of the claims.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
